

# How much e-waste is collected in states with electronics recycling laws?

Twenty five states have passed e-waste recycling laws, and all but two are based on “Producer Responsibility.” Only a few states report breakdowns by product type. Years where data is not available are shown in white background. This chart is updated regularly as data becomes available.  means the item is collected for free recycling but the state doesn’t provide collection data by category. (Figures in purple estimated or annualized.)

### Comparing data between the states.

To make fair comparisons, it's important to know that these programs are not all accepting the same products, and some collect from more than just households. (See whose products are covered on our [chart summarizing laws](#).) For instance, the California program accepts e-waste from all entities – business, consumers, etc. CA experts estimate that at least half the volume there comes from business. So those numbers should be expected to be higher than states that are only collecting from residents. For more information on state laws: <http://www.electronicstakeback.com/promote-good-laws/state-legislation/>

<sup>1</sup> Population stats through 2009 from US Census annual July estimates: <http://www.census.gov/popest/states/NST-ann-est.html> .

2010 Census data: <http://2010.census.gov/2010census/data/>

2011 Census data: <http://www.census.gov/popest/data/state/totals/2011/index.html>

2012 Census data: <http://www.census.gov/popest/data/state/totals/2012/index.html>

<sup>2</sup> We divide total population by the number of regular collection sites (meaning those operating year round). Of course, one would need to look at the location of the sites to assess whether all areas of the state are covered, but this statistic provides a very general metric for comparing the number of sites offered between states.

**KEY to Other Products:** C = Cell phone, CB = Converter box for TV, D = DVD player, DPF = Digital Picture Frames, E = E-Reader (Kindle, etc), F=Fax, G = Game console, K=Keyboard, M = Mouse, MP= MP3 player, S = Scanner, Sat = Satellite receiver or cable receiver, V= VCR

---

<sup>3</sup> Pounds per capita (pounds per person in the state) is used to compare collection volumes between states with different populations.

<sup>4</sup> In North Carolina, some of the local government collection programs are partially reimbursed from a State fund that receives fees paid by TV and computer manufacturers.

<sup>5</sup> Program went into effect mid-year, so manufacturers were required to report only July – Dec 2009 collection totals. Because this was only 6 months of collection, we multiplied the volumes time 2 to estimate an annual amount (for comparison's sake). However, according to the Virginia Dept of Environmental Quality, some companies reported annual totals in their 2009 numbers. So our annualized 2009 number was likely overstated.

<sup>6</sup> According to the VA DEQ, some companies have still not reported their 2010 numbers. We will revise this total, if these manufacturers report any volumes.

<sup>7</sup> Washington did not include a statewide disposal ban in its law, but some counties have established disposal bans (including King County).
